Databases: MongoDB

PROJECTS / OPEN-SOURCE

Text Editor | [Link](#)

Html,Css,JavaScript

- The goal of this project is to create a simple text editor web application using HTML, CSS, and JavaScript.
- The text editor should allow users to input and edit text, format it using basic styling options like bold, italic, underline, and change font size,colour.

Resume Maker | [Link](#)

React,Node.js,Express,MongoDB

- Developed a full-stack Resume Maker application using React for the frontend to create a dynamic and user-friendly interface and backend with Node.js and MongoDB to handle user data and resume generation, ensuring efficient and scalable data management.
- Integrated session-based authentication for secure user login and data protection.

URL Shortener | [Link](#)

Node.js,Express,MongoDB

- The URL Shortener project aims to develop a web application that allows users to transform long URLs into shorter, more manageable links.
- This service is particularly useful for sharing links on social media, emails, and other platforms where space is limited. The application will provide functionality to create, store, and manage shortened URLs
